How is the qualification structured?

To be awarded the **IOSH Level 6 Diploma in Occupational Safety and Health Leadership and Management**, learners are required to successfully complete **three mandatory units that focus on the IOSH competency framework**.

1

Advanced OSH management principles in organisations

Enabling learners to demonstrate advanced understanding of OSH legal frameworks and management principles, drawing from the **Technical** competencies, and assessing the ability to apply, develop and appraise different management approaches in the context of an organisation.

2

OSH integration within an organisation

Enabling learners to critically appraise OSH performance within an organisation and demonstrate a wide appreciation of how internal and external factors can influence OSH decision making, drawing from the **Technical** areas of culture and sustainability along with **Core** business competencies.

3

Leading and influencing in OSH

Enabling learners to demonstrate understanding and application of leadership skills that equip them to influence, challenge and drive change within OSH in an organisation, drawing from the **Behavioural** and **Core** competencies in the context of OSH.
